

The image shows a Windows development environment. On the left is a file explorer sidebar with a tree view showing a project structure. The main area is a code editor displaying the contents of a file named 'package-lock.json'. The code is a JSON object with a single key 'name' and a value 'playwright-script'. It also includes version, lockfileVersion, requires, and packages information. The packages section contains details for 'playwright-script' and 'playwright/test'. The bottom status bar shows the file is open in the 'JSON' language, with a line and column indicator. The Windows taskbar at the very bottom shows the system clock as 22:26 on 03-09-2026, along with various application icons.

```
class FacebookLoginPage {
    readonly page: Page;
    readonly emailInput: Locator;
    readonly passwordInput: Locator;
```

```
readonly loginButton: Locator;
```

```
constructor(page: Page) {  
  this.page = page;  
  this.emailInput = page.locator('input[name="email"]');  
  this.passwordInput = page.locator('input[name="pass"]');  
  // Facebook uses a button with text "Log In" or "Login"  
  this.loginButton = page.getByRole('button', { name: /log[\s-]?in/i });  
}
```

```
async login(email: string, password: string) {  
  await this.emailInput.fill(email);  
  await this.passwordInput.fill(password);  
  await this.loginButton.click();  
}  
}
```

```
test.describe('TC_001 Verify user can log in with valid email/mobile and password', () => {  
  const FB_EMAIL = process.env.FB_EMAIL || 'your_email@example.com';  
  const FB_PASSWORD = process.env.FB_PASSWORD || 'your_password';
```

```
test('User should be authenticated and redirected to News Feed', async ({ page }) => {  
  const loginPage = new FacebookLoginPage(page);
```

```
  // 1. Navigate to facebook.com  
  await page.goto('https://www.facebook.com/');
```

```
  // 2-4. Perform login  
  await loginPage.login(FB_EMAIL, FB_PASSWORD);
```

```
  // Expected: user is redirected to home/feed page
```

```
// Wait for navigation after login
```

```
await page.waitForLoadState('networkidle');
```

```
// Verify that the login form is no longer visible
```

```
await expect(loginPage.emailInput).toBeHidden();
```

```
// Verify that the URL is the Facebook home (contains "facebook.com" without "login")
```

```
await expect(page).toHaveURL(/https:\/\/www\.facebook\.com\/?$/);
```

```
// Optionally, verify that the News Feed is present
```

```
const feed = page.getByRole('feed');
```

```
await expect(feed).toBeVisible();
```

```
});
```

```
});
```
