Domain

ID	Title	Steps	Expected Result
TC-001	Crop Management - Create New Crop	Login to the farm management system Navigate to the crop management module Click on 'Create New Crop' button Enter crop details such as name, type, and variety Save the new crop entry	The new crop is successfully created and displayed in the crop list
TC-002	Irrigation Workflow - Schedule Irrigation	Login to the farm management system Navigate to the irrigation module Select a crop and field to schedule irrigation for Choose an irrigation schedule and set the start date and time Save the irrigation schedule	The irrigation schedule is successfully saved and displayed in the irrigation calendar
TC-003	Fertilization Workflow - Apply Fertilizer	Login to the farm management system Navigate to the fertilization module Select a crop and field to apply fertilizer Choose a fertilizer type and amount Record the application details	The fertilization application is successfully saved and displayed in the fertilization log
TC-004	Supply Chain Traceability - Track Crop Movement	Login to the farm management system Navigate to the supply chain module Select a crop and field to track movement Record the movement details (location, time, status)	The crop movement history and current location are accurately displayed
TC-005	Farm Equipment Controls - Start Tractor	Login to the farm management system Navigate to the equipment module Select a tractor to start Start the tractor and record the status	The tractor is successfully started and its status is updated in the equipment list
TC-006	Quality Inspection - Conduct Crop Inspection	Login to the farm management system Navigate to the quality inspection module Select a crop and field for inspection Perform the inspection and record the results	The inspection results are accurately recorded and displayed in the quality inspection log
TC-007	Regulatory Compliance - Check Compliance Status	Login to the farm management system Navigate to the regulatory compliance module Check the compliance status for various regulations	The compliance status and required actions are accurately displayed
TC-008	Seasonal Harvest Planning - Create Harvest Plan	Login to the farm management system Navigate to the harvest planning module Select crops to be harvested and plan the harvest schedule	The harvest plan is successfully created and displayed in the harvest calendar
